DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10 and 22-23, drawn to method and apparatus for verifying a component.

Group II, claim(s) 11 and 24, drawn to a component arrangement data generation method and apparatus for.

Group III, claim(s) 12-13 and 25, drawn to a component library generation method and apparatus.

Group IV, claim(s) 14-17 and 26-28, drawn to a component management method and mounter.

Group V, claim(s) 18-21, drawn to a component holder.

Group VI, claim(s) 29, drawn to a mounter.

Group VII, claim(s) 30-31, drawn to a program for verifying a component.

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I lacks the same or corresponding special technical features such as: generating the component arrangement data and library steps; writing step and mounting step. Group II lacks the same or corresponding special technical features such as: verifying step, generating the component library steps, writing step and mounting step. Group III lacks the same or corresponding special technical features such as: verifying steps, generating the component arrangement step, writing step and mounting step. Group IV lacks the same or corresponding special technical features such as: verifying steps, generating the component arrangement and library steps and positioning step. Group V lacks the same or corresponding special technical features such as: verifying step, generating the component arrangement library steps, writing step and mounting step. Group VI lacks the same or

corresponding special technical features such as: generating the component library steps, writing step. Group VII lacks the same or corresponding special technical features such as: generating the component library steps, writing step and mounting step.

3. A telephone call was not made to attorney of record because of the complexity of the restriction.

Applicants are advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
